

**NAAN MUDHALVAN**  
**Salesforce Developer (Course)**  
**Assignment No - 1**

Name : DINESH M

NM id : au611220205004

Year & Dep : IV year & IT

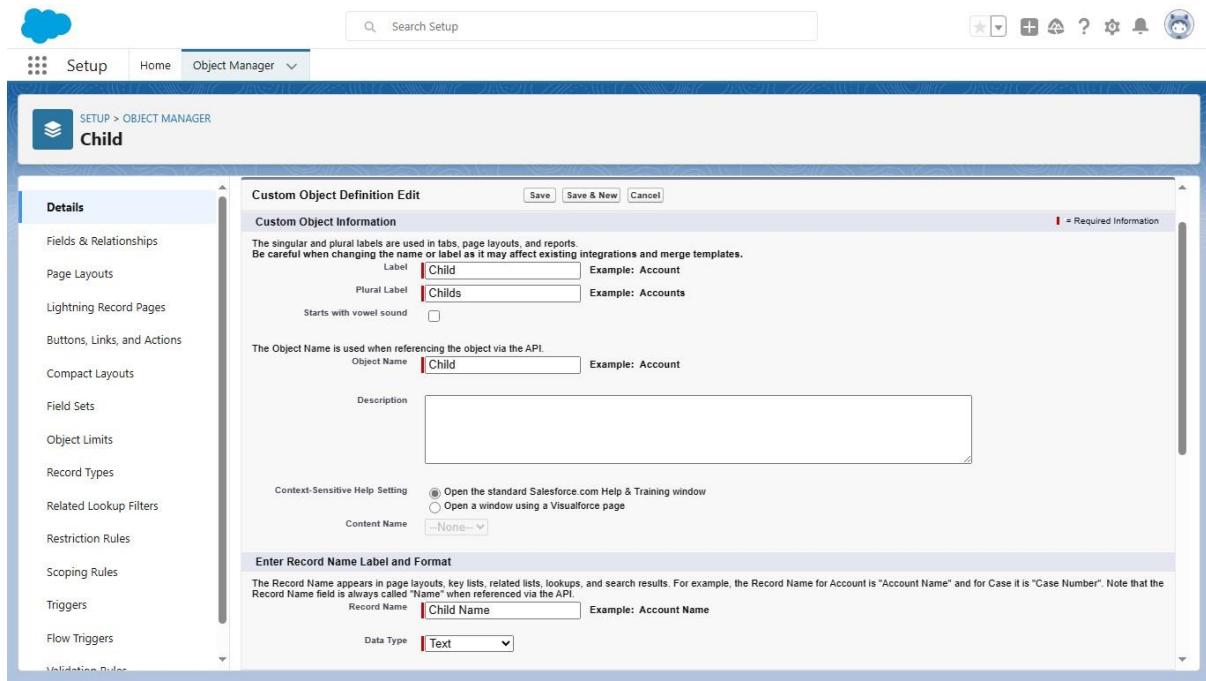

Batch : 2024

Zone no : Zone 8

**1. Creating a Master-Detail Relationship between two custom objects and setting up a Roll-Up Summary Field to calculate the total number of records in the child object is a common task in Salesforce. Below are the steps to achieve this:**

## **Step 1: Create Custom Objects.**

## Step 2: Create a Master-Detail Relationship

1. Go to "Setup" in Salesforce.
2. In the Quick Find box, type "Objects" and select "Objects and Fields" > "Objects".
3. Click on "Parent" to edit it.
4. In the "Custom Fields & Relationships" section, click "New" under "Related To".
5. Choose "Master-Detail Relationship" as the data type.
6. In the "Related To" field, select "Child".
7. Configure other options as needed (e.g., setting the relationship name and whether it's required).
8. Save the changes.

The screenshot shows the Salesforce Object Manager interface for the 'Parent' object. The left sidebar has 'Fields & Relationships' selected. The main area displays a table titled 'Fields & Relationships' with 4 items, sorted by Field Label. The columns are FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Last Modified By	LastModifiedBy	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Parent Name	Name	Text(80)		✓

The screenshot shows the process of creating a new custom field for the 'Parent' object. The left sidebar has 'Fields & Relationships' selected. The main area is titled 'New Custom Field' and is currently on 'Step 1. Choose the field type'. The step title is 'Step 1' and there are 'Next' and 'Cancel' buttons at the top right.

**Data Type**

None Selected      Select one of the data types below.

Auto Number      A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula      A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary      A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Master-Detail Relationship      Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.  
Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship      Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

The screenshot shows the Salesforce Setup interface for creating a new relationship between the Parent and Child objects. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main title is 'Parent' under 'SETUP > OBJECT MANAGER'. A sidebar on the left lists various object configuration options like Page Layouts, Lightning Record Pages, and Fields & Relationships. The current section is 'Fields & Relationships'. The main content area is titled 'New Relationship' and 'Step 2. Choose the related object'. It asks 'Select the other object to which this object is related.' with a dropdown menu showing 'Child' as the selected option. Navigation buttons at the bottom right include 'Previous', 'Next', and 'Cancel'.

The screenshot shows the Salesforce Setup interface for the Child object's Fields & Relationships. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main title is 'Child' under 'SETUP > OBJECT MANAGER'. A sidebar on the left lists various object configuration options like Page Layouts, Lightning Record Pages, and Fields & Relationships. The current section is 'Fields & Relationships'. The main content area is titled 'Fields & Relationships' and shows a table of fields. The table has columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The table rows are:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Child Name	Name	Text(80)		✓
Created By	CreatedBy	Lookup(User)		
Last Modified By	LastModifiedBy	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
total child count	total_child_count_c	Roll-Up Summary (COUNT Parent)		

Navigation buttons at the top right include 'Quick Find', 'New', 'Deleted Fields', 'Field Dependencies', and 'Set History Tracking'.

### Step 3: Create a Roll-Up Summary Field

1. In the same "Parent" editing page, scroll down to the "Roll-Up Summary Fields" section.
2. Click "New Roll-Up Summary Field."
3. Choose the "Child" as the child object for which you want to calculate the total.
4. Give your Roll-Up Summary Field a name (e.g., "Total\_Child\_Records\_\_c").
5. Choose the type of calculation you want (e.g., "COUNT").
6. Configure any additional filter criteria if needed.
7. Save the changes.

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The left sidebar has 'User Interface' expanded, with 'Tabs' selected. A message at the top says 'Didn't find what you're looking for? Try using Global Search.' The main content area displays four sections: 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', and 'Lightning Component Tabs'. Each section has a 'New' and 'What Is This?' link. The 'Custom Object Tabs' section contains the following data:

Action	Label	Tab Style	Description
Edit   Del	Brokers	People	
Edit   Del	Childs	Lightning	
Edit   Del	Parents	Lightning	
Edit   Del	Properties	Real Estate Sign	

## Step 4: Update Page Layouts and Record Types (if necessary)

**Depending on your use case, you may want to update page layouts and record types to make sure the new relationship and fields are displayed correctly to your users.**

**Lightning Experience App Manager**

**New Lightning App**

**App Details & Branding**

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

<b>App Details</b>	<b>App Branding</b>
* App Name <input type="text" value="Parent Details"/>	Image <input type="file"/>
* Developer Name <input type="text" value="Chandru s"/>	Primary Color Hex Value <input type="text" value="#0070D2"/>
Description <input type="text" value="Enter a description..."/>	Org Theme Options <input type="checkbox"/> Use the app's image and color instead of the org's custom theme
App Launcher Preview	
<span>Next</span>	

## Step 5: Test the Relationship and Roll-Up Summary Field

**Create some records in both the Parent and Child objects and verify that the Roll-Up Summary Field correctly calculates the total number of related Child records on the Parent record.**

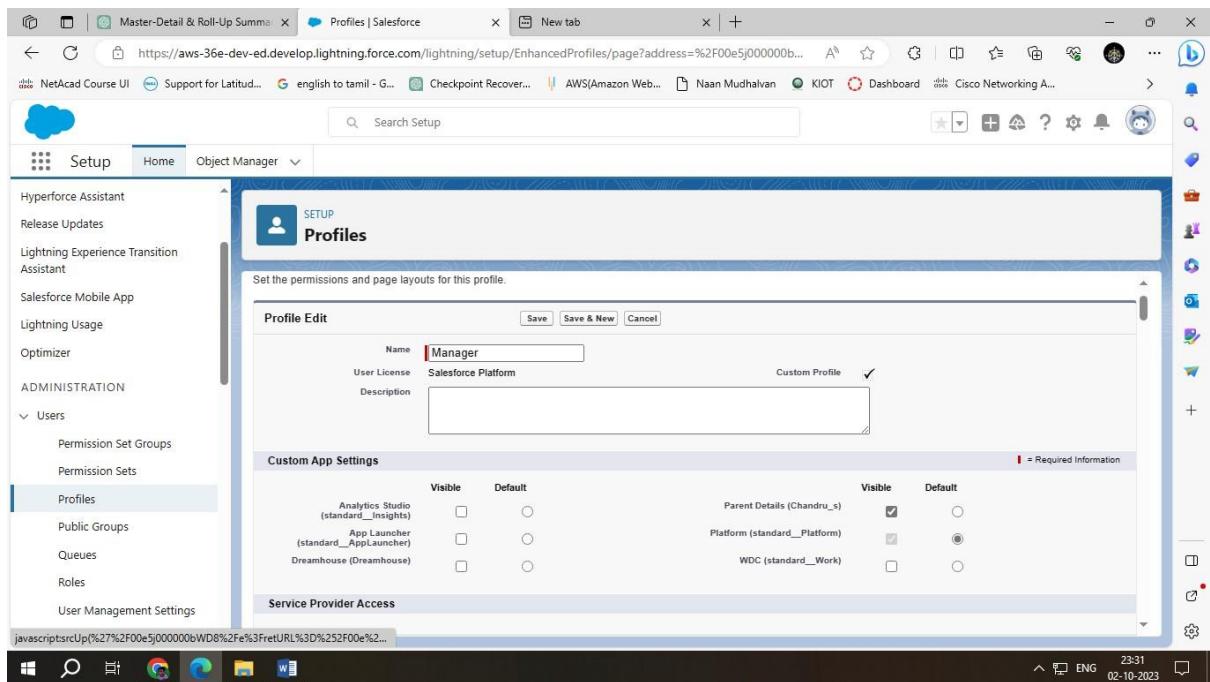

**That's it! You've successfully created a Master-Detail relationship between two custom objects (Parent and Child) and set up a Roll-Up Summary Field to calculate the total number of records in the Child object.**

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply th Security for the users.

#### **Step 1: Create a Public Group**

1. Go to "Setup" in Salesforce.
2. In the Quick Find box, type "Public Groups" and select it.
3. Click on "New Public Group."
4. Create a group for User A, let's call it "UserA\_Group," and add User A to this group.
5. Create another group for User B, let's call it "UserB\_Group," and add User B to this group.

## Step 2: Create Criteria-Based Sharing Rules

For User A:1. Go to "Setup" in Salesforce.

2. In the Quick Find box, type "Sharing Rules" and select "Sharing Settings."

- 3. Under "Account Sharing Rules," click on "New Sharing Rule."**
- 4. Create a rule that shares records owned by members of "UserB\_Group" with the "UserA\_Group."**
- 5. Define the criteria based on which records should be shared (e.g., ownership).**
- 6. Save the sharing rule.**

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. The main content area displays the 'User Detail' page for a user named 'Sunil A'. The user's details include:

Name	Sunil A	Role
Alias	sa	User License
Email	2k20cse176@kiot.ac.in [Verify]	Profile
Username	2k21cse176@kiot.ac.in	Active
Nickname	User169631476178576A93816	Marketing User
Title		Offline User
Company	Male	Knowledge User
Department		Flow User
Division		Service Cloud User
Address	2/73 Kankandaipalayam Malasamudram 637503 Tamil Nadu India	Site.com Contributor User
Time Zone	(GMT+05:30) India Standard Time (Asia/Kolkata)	Site.com Publisher User
Locale	English (India)	WDC User
Language	English	Mobile Push Registrations
Delegated Approver		Data.com User Type
Manager		Accessibility Mode (Classic Only)
Receive Approval Request Emails	Only if I am an approver	Debug Mode
Expiration ID		Print Contract Palette on Charts

At the top right of the detail page, there is a link to 'User ProfileHelp for this Page'.

The screenshot shows the Gmail inbox with a single email from 'support@salesforce.com'. The subject of the email is 'Welcome to Salesforce: Verify your account'. The email body contains the following text:

Welcome to Salesforce!

Click below to verify your account.

[Verify Account](#)

To easily log in later, save this URL:  
<https://aws-36e-dev-ed-develop.my.salesforce.com>

Username:  
2k21cse176@kiot.ac.in

Again, welcome to Salesforce!

The screenshot shows the "Change Your Password" page from the Salesforce login interface. At the top, there's a blue cloud logo with the word "salesforce". Below it, the title "Change Your Password" is centered. A message box contains instructions: "Enter a new password for 2k21cse176@kiot.ac.in. Make sure to include at least:" followed by three requirements with green checkmarks: "8 characters", "1 letter", and "1 number". The "New Password" field contains "....." and is labeled "Good". The "Confirm New Password" field also contains "....." and is labeled "Match". A note below says "Caps Lock Is on." The "Security Question" field has a dropdown menu showing "In what city were you born?". The "Answer" field contains "SALEM". At the bottom is a large blue "Change Password" button.

The screenshot shows the "Profiles" page in the Salesforce Setup interface. The left sidebar is titled "Setup" and includes sections like "Hyperforce Assistant", "Release Updates", "Lightning Experience Transition Assistant", "Salesforce Mobile App", "Lightning Usage", "Optimizer", "ADMINISTRATION" (with "Users", "Permission Set Groups", "Permission Sets", "Profiles" selected), "Public Groups", "Queues", "Roles", "User Management Settings", and "Users". The main content area is titled "Profiles" and shows a "Profile Edit" for the "Bmanager" profile. The "Profile Edit" form has fields for "Name" (Bmanager), "User License" (Salesforce Platform), "Description" (Custom Profile checked), and "Custom App Settings" for various apps like Analytics Studio, App Launcher, Dreamhouse, Parent Details, Platform, and WDC. It also includes sections for "Service Provider Access" and "Tab Settings". At the bottom right, there are "Learning" and "Default On" buttons.

### For User B:

- 1. Follow the same steps as above but create a separate sharing rule for User B.**
- 2. This rule should share records owned by members of "UserA\_Group" with the "UserB\_Group."**
- 3. Define the criteria based on which records should be shared.**

#### 4. Save the sharing rule.

The screenshot shows the Salesforce Setup interface. On the left, the navigation sidebar is open, showing various administrative sections like Hyperforce Assistant, Release Updates, and Administration. Under Administration, the 'Users' section is expanded, and 'Permission Set Groups' is selected. The main content area is titled 'New User' under 'User Edit'. The 'General Information' tab is active. The user details entered are: First Name - Sanjay, Last Name - P, Alias - sp, Email - 2k20cse171@kiot.ac.in, Username - 2k22cse171@kiot.ac.in, Nickname - User1696315620912300622, Title - (empty), Company - (empty), Department - (empty), Division - (empty). The 'Role' dropdown is set to '<None Specified>'. The 'User License' dropdown is set to 'Salesforce Platform'. The 'Profile' dropdown is set to 'Bmanager'. The 'Active' checkbox is checked. Other checkboxes for Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, and WDC User are all unchecked. The 'Data.com User Type' dropdown is set to '-None--'. The 'Data.com Monthly Activity Limit' dropdown is set to 'Default Limit (300)'. The 'Accessibility Mode (Classic Only)' checkbox is unchecked. The 'High-Contrast Palette on Charts' checkbox is unchecked. The 'Load Lightning Pages While' dropdown is set to 'F2'. At the bottom right of the form, there are 'Save', 'Save & New', and 'Cancel' buttons.

#### Step 3: Assign Records Ownership

The screenshot shows the Salesforce Setup interface. The navigation sidebar is open, showing various administrative sections. Under 'Administration', the 'Permission Sets' section is selected. The main content area is titled 'Permission Set Create'. The 'Enter permission set information' tab is active. The 'Label' field contains 'permission', the 'API Name' field contains 'permission', and the 'Description' field is empty. The 'Session Activation Required' checkbox is unchecked. Below this, a section titled 'Select the type of users who will use this permission set' is shown. It includes a note about choosing license types and a question about permission set license assignment. The 'License' dropdown is set to '-None-'. At the bottom right of the form, there are 'Save' and 'Cancel' buttons.

The screenshot shows the Salesforce Setup interface with the following details:

- Left Sidebar:** Shows navigation categories like Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION (with sub-options like Users, Permission Set Groups, and Permission Sets), and PLATFORM TOOLS.
- Current Page:** The main content area is titled "Permission Sets" under "SETUP". It displays the "Object Settings" for the "permission" object.
- Object Settings Table:**

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Optimizer, Administration (Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, Users), Data, Email, Platform Tools (Subscription Management, Apps, Feature Settings, Slack, MuleSoft, Einstein), and Quick Find.

The main content area displays the 'Clone Profile' screen. It prompts the user to enter the name of the new profile ('Enter the name of the new profile.') and specifies that an existing profile must be selected ('You must select an existing profile to clone from.'). A dropdown menu shows 'Standard Platform User' as the selected profile. The 'User License' is listed as 'Salesforce Platform' and the 'Profile Name' is 'Manager'. Buttons for 'Save' and 'Cancel' are at the bottom.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, Administration (Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings), and Quick Find.

The main content area displays the 'Profile Detail' screen for the 'chan' profile. The profile name is 'chan', user license is 'Salesforce Platform', and it is a 'Custom Profile'. The profile was created by 'Chandru S.' on 03/10/2023, 1:50 pm and modified by 'Chandru S.' on the same date and time. The 'Page Layouts' section lists various standard object layouts assigned to the profile, such as Global Layout for Email Application, Home Page Default for Home Page Layout, Account Layout for Account, Alternative Payment Method Layout for Alternative Payment Method, Appointment Invitation Layout for Appointment Invitation, and Asset Layout for Asset.

The screenshot shows the Salesforce Setup interface under the Profiles section. The left sidebar includes links like Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and various Administration sections. The main content area is titled 'Profiles' and contains two tables for 'Basic Access' and 'Data Administration' across 'Brokers', 'Childs', 'Parents', and 'Properties'. Below these are 'Session Settings' (Session Times Out After: 2 hours of inactivity, Session Security Level Required at Login: None) and 'Password Policies' (User passwords expire in: 90 days, Enforce password history: 3 passwords remembered, Minimum password length: 8, Password complexity requirement: Must include alpha and numeric characters, Password question requirement: Cannot contain password, Maximum invalid login attempts: 10, Lockout effective period: 15 minutes, Obscure secret answer for password resets, Require a minimum 1 day password lifetime, and Don't immediately expire links in forgot password emails). At the bottom are Save, Save & New, and Cancel buttons.

The screenshot shows the 'Profile Edit' screen for a profile named 'chan'. The left sidebar is identical to the previous screenshot. The main content area shows the 'Profile Edit' form with fields for Name (chan), User License (Salesforce Platform), Description, and a 'Custom Profile' checkbox (which is checked). Below this are sections for 'Custom App Settings' (with rows for Analytics Studio, App Launcher, and Dreamhouse, each with Visible and Default checkboxes), 'Service Provider Access' (with rows for Parent Details, Platform, and WDC, each with Visible and Default checkboxes), and 'Tab Settings' (with a checkbox for Overwrite users' personal tab customizations and Standard Tab Settings). At the bottom are Save, Save & New, and Cancel buttons.

The screenshot shows the Salesforce Lightning Experience interface. The left sidebar is titled 'ADMINISTRATION' and includes sections for 'Users' (selected), 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', 'Queues', 'Roles', 'User Management Settings', and 'Data', 'Email', 'Platform Tools', 'Subscription Management', 'Apps', 'Feature Settings', 'Slack', 'MuleSoft', and 'Einstein'. The main content area is titled 'SETUP Users All Users'. It displays a table of users with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. The table lists several users, including 'A\_Sunil' (Role: Manager, Active: checked), 'Chatter Expert' (Role: Chatter Free User, Active: checked), 'P\_Sanjay' (Role: Manager, Active: checked), 'S\_Chandru' (Role: System Administrator, Active: checked), 'User\_Integration' (Role: Analytics Cloud Integration User, Active: checked), and 'User\_Security' (Role: Analytics Cloud Security User, Active: checked). Buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users' are at the top of the table.

The screenshot shows the Salesforce Setup interface. The left sidebar is identical to the one in the top screenshot. The main content area is titled 'SETUP Users New User'. It shows a 'User Edit' form with tabs for 'General Information', 'Profile', 'Permissions', 'Licenses', and 'Advanced'. The 'General Information' tab is active, displaying fields for First Name (Sunil), Last Name (A), Alias (sa), Email (2k20cse176@kiot.ac.in), Username (2k20cse176@kiot.ac.in), Nickname (User1696321490080232961), Title, Company (Male), Department, and Division. On the right side, there are sections for Role (<None Specified>, Salesforce Platform, chan, Active checked), Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, WDC User, Data.com User Type (None, Default Limit (300)), Accessibility Mode (Classic Only, High-Contrast Palette on Charts), and Load Lightning Pages While.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. The main content area displays the 'User Detail' page for a user named 'Sunil A'. The page includes fields for Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Address, Time Zone, Locale, Language, Delegated Approver, Manager, Receive Approval Request Emails, and Preference ID. It also lists various roles and user licenses. A 'Help for this Page' link is located in the top right corner.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. The main content area displays the 'User Edit' page for a user named 'Sunil A'. The page includes fields for First Name, Last Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Role, User License, Profile, Active status, Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, WDC User, Mobile Push Registrations, Data.com User Type, Accessibility Mode, Debug Mode, and High-Contrast Palette on Charts. A 'Help for this Page' link is located in the top right corner.

## Step 2: Assign the Permission Set to the User Needing Delete Access

1. In the "Permission Set Detail" page, click on "Manage Assignments."
2. Click "Add Assignments" and select the user who needs delete access.
3. Save the assignment.

The screenshot shows the Salesforce Setup interface. The left sidebar is titled "Setup" and includes sections for Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and ADMINISTRATION. Under ADMINISTRATION, there are sub-sections for Permission Set Groups, Permission Sets (which is selected), Profiles, Public Groups, Queues, Roles, and User Management Settings. The main content area is titled "Permission Sets" and shows a "Permission Set Overview" for "permission01". The "Edit Properties" dialog is open, showing fields for Label (set to "permission01"), API Name (set to "permission01"), Description (empty), Session Activation Required (unchecked), and Activation Required (unchecked). Below the properties, there are sections for "App Permissions", "Apex Class Access", "Visualforce Page Access", and "External Data Source Access".

This screenshot shows the "Accounts" tab of the "permission01" Permission Set. The top navigation bar includes "Object Settings" and "Accounts". The "Object Permissions" section lists permissions for the Account object, with checkboxes for Read, Create, Edit, Delete, View All, and Modify All. The "Field Permissions" section lists permissions for specific fields: Account Name, Account Number, Account Owner, Account Site, Account Source, Active, and Annual Revenue. For each field, there are checkboxes for Read Access and Edit Access.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' tab selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION, and Users. Under Users, 'Permission Set Groups' and 'Permission Sets' are listed, with 'Permission Sets' being the active tab. The main content area displays the 'Permission Sets' page for 'permission01'. It shows sections for 'Object Permissions' and 'Field Permissions'. The 'Object Permissions' table lists permissions for 'Accounts': Read, Create, Edit, Delete, View All, and Modify All. The 'Field Permissions' table lists permissions for fields like Account Name, Account Number, Account Owner, Account Site, Account Source, Active, and Annual Revenue.

The screenshot shows the Salesforce Setup interface with the 'All Users' page selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION, and Users. Under Users, 'Permission Set Groups' and 'Permission Sets' are listed, with 'Permission Sets' being the active tab. The main content area displays the 'All Users' page, which lists users with their full name, alias, username, role, access level, and profile. Two users, Sunil A and Sunil A, are selected. The 'Next' button is visible at the bottom right.

The screenshot shows the Salesforce Setup interface. On the left, the navigation bar includes 'Setup' (selected), 'Home', and 'Object Manager'. The main content area is titled 'Selected Users' and displays a table of users assigned to a permission set. The table columns are: Full Name, Role, Profile, Active, User License, and Expires On. Two users, both named 'Sunil A' and assigned the 'chan' profile, are listed. Both have 'Active' checked, 'Salesforce Platform' as the User License, and 'Never Expires' as the Expires On date. Above the table, there are two radio button options: 'No expiration date' (selected) and 'Specify the expiration date' (with sub-options for 1 Day, 1 Week, 30 Days, 60 Days, and Custom Date). To the right of the table is a 'Time Zone' dropdown labeled 'Select a time zone...'. At the bottom right of the content area are 'Back' and 'Assign' buttons.

The screenshot shows the Salesforce Setup interface after the assignment. The main content area has a green success message at the top: '2 assignments were successful.' Below it, the title 'permission01' is displayed. The 'Assignment Summary' table shows the same two assignments as the previous screen. The table columns are: Full Name, User License, Expires On, Time Zone, and Status. Both assignments show 'Success' in the Status column. At the bottom right of the content area is a 'Done' button.

**4.Create a screen flow for a basic survey to fill in the details for any form.**

## Step 1: Create a custom object

1. Click Setup.
2. In the Object Manager, click Create | Custom Object.
3. Now create a custom object Survey Result and fields as shown in the screenshot below:
4. Click Save.

The screenshot shows the Salesforce Object Manager interface. At the top, it says "SETUP > OBJECT MANAGER" and the object name is "Survey Result". Below the header, there's a "Fields & Relationships" section. On the left, a sidebar lists various customization options: Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, Search Layouts for Salesforce Classic, Triggers, and Validation Rules. The main area displays the "Fields & Relationships" table with the following data:

Fields & Relationships		FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Page Layouts	Comment	Comment__c	Text Area(255)			
Lightning Record Pages	Created By	CreatedById	Lookup(User)			
Buttons, Links, and Actions	Email	Email__c	Email			
Compact Layouts	Last Modified By	LastModifiedById	Lookup(User)			
Field Sets	Name	Name__c	Text(51)			
Object Limits	Owner	OwnerId	Lookup(User,Group)		✓	
Record Types	Rating	Rating__c	Picklist			
Related Lookup Filters	Survey Result Name	Name	Auto Number		✓	
Search Layouts						
Search Layouts for Salesforce Classic						
Triggers						
Validation Rules						

## Step 2: Create a Thank You For Survey Lightning Email Template

1. Click App Launcher.
2. In the Quick Find box, type Email Templates.
3. Clicks on the New Email template button.
4. Name the Lightning Email Template and make sure to store it in the Public Email Templates folder.
5. Create a template like the following screenshot

Email Template  
Thank You Email - Survey

**Details** Related

**Information**

Email Template Name Thank You Email - Survey	Related Entity Type Survey Result
Description	Folder Public Email Templates
Made in Email Template Builder <input checked="" type="checkbox"/>	

**Message Content**

Subject Thank You For Completing Our Survey!	Enhanced Letterhead
HTML Value	<p>Hi {{Survey_Result__c.Name__c}},</p> <p>Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.</p> <p>Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.</p> <p>Thanks, Automation Champion</p>

### Step 3: Create an Email Alert

1. Click Setup.
2. In the Quick Find box, type Email Alerts.
3. Select Email Alerts, click on the New Email Alert button.
4. Name the Email Alert and click the Tab button. The Unique Name will populate.
5. For Object select Survey Result.
6. For the Email Template chooses Lightning Email Template Thank You Email - Survey.
7. For Recipient Type select Email Field: Email.

## 8.Click Save.

Survey - Thank You Email

Description: Survey - Thank You Email

Unique Name: Survey\_Thank\_You\_Email

Object: Survey Result

Email Template: Thank You Email - Survey

Protected Component:

Recipient Type: Search: User for:

Recipients:

Available Recipients	Selected Recipients
User: Integration User User: Rakesh Gupta User: Security User	Email Field: Email

Add  Remove

You can enter up to five (5) email addresses to be notified.

Additional Emails

From Email Address: Current User's email address

Make this address the default From email address for this object's email alerts.

Save  Save & New  Cancel

## Step 4.1: Salesforce Flow - Create a Screen that Allow Users to Fill Survey

- 1.Click Setup.
- 2.In the Quick Find box, type Flows.
- 3.Select Flows then click on the New Flow.
- 4.Select the Screen Flow option and click on Next and configure the flow as follows:
- 5.How do you want to start building: Freeform
- 6.We will use the Screen element to capture a Survey response form. Drag and drop a Screen element onto the canvas.

## **Step 4.2: Salesforce Flow - Add a Record Creates Element to Save Survey Response**

- 1.Drag-and-drop the Create Records element onto the Flow designer.
- 2.Enter a name in the Label (Save Response) field; the API Name will auto-populate.
- 3.For How Many Records to Create - select One.
- 4.For How to Set the Record Fields - select Use separate resources, and literal values.
- 5.Select the Survey\_Result\_\_c object from the dropdown list.
- 6.Set Field Values for the Survey Result

Row 1:

Field: Comment\_\_c

Value: {!Comment}

Click Add Row

Row 2:

Field: Email\_\_c

Value: {!Email.value}

Click Add Row

Row3:

Field: Name\_\_c

Value: {!Name.firstName} {!Name.lastName}

Click Add Row

Row 3:

Field: Rating\_\_c

Value: {!Rating}

7.Click Done.

**Edit Create Records**

Create Salesforce records using values from the flow.

<b>*Label</b> <input type="text" value="Save Response"/>	<b>*API Name</b> <input type="text" value="Save_Response"/>
<b>Description</b> <input type="text"/>	
<b>How Many Records to Create</b> <input checked="" type="radio"/> One <input type="radio"/> Multiple	
<b>How to Set the Record Fields</b> <input type="radio"/> Use all values from a record <input checked="" type="radio"/> Use separate resources, and literal values	
<b>Create a Record of This Object</b>	
<b>*Object</b> <input type="text" value="Survey Result"/>	
<b>Set Field Values for the Survey Result</b>	
<b>Field</b> <input type="text" value="Comment__c"/>	<b>Value</b> <input type="text" value="A_a Comment X"/>
<b>Field</b> <input type="text" value="Email__c"/>	<b>Value</b> <input type="text" value="A_a Email &gt; Value X"/>
<b>Field</b> <input type="text" value="Name__c"/>	<b>Value</b> <input type="text" value="={!Name.firstName} {!Name.lastName}"/>
<b>Field</b> <input type="text" value="Rating__c"/>	<b>Value</b> <input type="text" value="A_a Rating X"/>
<input type="button" value="+ Add Field"/>	
<input type="checkbox"/> Manually assign variables	
<input type="button" value="Cancel"/> <input type="button" value="Done"/>	

### Step 4.3: Salesforce Flow - Call an Action - Email Alert to Send Out Thank You Email

- 1.Under Toolbox, select Element.
- 2.Drag-and-drop Action element onto the Flow designer.
- 3.In the Action box, type Survey - Thank You Email.

4.Clicks on the Survey - Thank You Email email alert.

5.Click Done.

Edit "Survey - Thank You Email" email alert

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

* Label	* API Name
Send Thank You Email	Send_Thank_You_Email

## Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the lightning:flow component.

- 1.Click Setup | Developer Console
- 2.Navigate to File | New | Lightning Application
- 3.Enter a Name (VFPageToLC) field, make sure to select the Lightning Out Dependency App checkbox.
- 4.Click Submit.
- 5.Copy code from GitHub and paste it into your Lightning Application.
- 6.Save your code.

File ▾ Edit ▾ Debug ▾ Test ▾ Workspace ▾ Help ▾ < >

VFPageToLC.app \*

```
1 <aura:application access="global"
2           extends="ltng:outApp"
3           implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5   </aura:application>
```

Logs, Tests, and Problems

The screenshot shows the Visualforce Page Editor interface. At the top, it says "Visualforce Page Survey". Below that is the "Page Edit" toolbar with buttons for Save, Quick Save, Cancel, Where is this used?, Component Reference, and Preview. The main area is titled "Page Information" with a note "Required Information" indicated by a red asterisk. It includes fields for Label (Survey), Name (Survey), Description (empty), and checkboxes for "Available for Lightning Experience, Experience Builder sites, and the mobile app" (checked) and "Require CSRF protection on GET requests" (unchecked). Below this is the "Visualforce Markup" tab, which is selected, showing the following code:

```
<apex:page showheader="false" lightningStylesheets="true">
<html>
<head>
<apex:includeLightning />
<!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
<div id="flowContainer" />
<script>
var statusChange = function (event) {
if(event.getParam("status") === "FINISHED") {
var outputVariables = event.getParam("outputVariables");
var key;
for(key in outputVariables) {
if(outputVariables[key].name === "myOutput") {
}
}
}
};
$Lightning.use("c:VFPPageToLC", function() {
$Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
"flowContainer",
function (component) {
component.startFlow("Survey", );
}
);
});
</script>
</body>
```

## Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

- 1.Click Setup.
- 2.In the Quick Find box, type Sites.
- 3.Clicks on the New button.
- 4.Fill the details as per the screenshot below:
- 5.Click Save.

**Site Edit**

**Save** **Cancel**

Site Label	Survey 
Site Name	Survey 
Site Description	    
Site Contact	Rakesh Gupta  
Default Record Owner	Rakesh Gupta  
Default Web Address	http://katihar-developer-edition.gus.force.com/ survey 
Active	<input checked="" type="checkbox"/> 
Active Site Home Page	Survey  
Inactive Site Home Page	InMaintenance  
Site Template	SiteTemplate  
Site Robots.txt	 
Site Favorite Icon	 
Analytics Tracking Code	 
URL Rewriter Class	  
Enable Feeds	<input type="checkbox"/>
Clickjack Protection Level	Allow framing by the same origin only (Recommended)  
Require Secure Connections (HTTPS)	<input checked="" type="checkbox"/> 
Lightning Features for Guest Users	<input checked="" type="checkbox"/> 
Upgrade all requests to HTTPS	<input checked="" type="checkbox"/> 
Enable Content Sniffing Protection	<input checked="" type="checkbox"/> 
Enable Browser Cross Site Scripting Protection	<input checked="" type="checkbox"/> 
Referrer URL Protection	<input checked="" type="checkbox"/> 
Guest Access to the Payments API	<input type="checkbox"/> 

Under site, Public Access Settings make sure that guest users have Create access on Survey Result object and Edit on the fields.

## Proof of Concept

Now onward, if someone opens the site url and fills the form:

**Survey**
